### From your stash:

- Crimp Beads - Qty 2
- Crimp Covers - Qty 2
- Beading Wire - Approx. 12 inches

### Tools needed:

- Wire cutters
- Crimp Tool
- Bead Stopper

## Sonoran Beads

### Step-by-step instructions:

- Cut a piece of beading wire approximately 12 to 14 inches.
- String on 4 seed beads and attach a bead stopper to the end.
- String on a donut bead, a seed bead, a Kazuri Shale bead, a seed bead, a donut bead, a seed bead and a seashell bead. Repeat this pattern until all of the beads are used and ending with a donut bead. Make certain there is a seed bead between each bead added.
- String on four seed beads to the end and add a crimp bead.
- Pass the wire through the loop on one end of the toggle clasp and insert the wire back through the crimp bead. Adjust the wire length then crimp the crimp bead. Trim the excess wire. Attach the crimp cover over the crimp bead. Continue in the same manner with the other side.

**Hint:** To lengthen the bracelet more seed beads can be added to the each end of the bracelet or extra seed beads can be added between all or some of the beads. Each kit has extra seed beads to allow for lengthening.
