### From your stash:

- Silver crimp covers
- 1-2mm silver hook & eye clasp

### Tools needed:

- Wire cutters
- Crimp tool
- Chain nose pliers
- Felt tip marker
- Superglue
- Measuring tape or ruler

## Sonoran Beads

### Step-by-step instructions:

1. Cut a piece of SilverSilk 18" long (or whatever length you prefer). Fold it in half and find the center and make a small mark with your felt tip marker.
2. Slide a coconut onto the wire until it covers the mark you made in step 1. Slide a crimp bead onto the wire on one side of the coconut until it rests next to the coconut and crimp it. Cover it with a crimp cover. Slide a crimp bead onto the wire on the other side of the coconut until it rests next to the coconut and crimp it. Cover it with a crimp cover. This is your center bead cluster. You will now work out from this point on each side of the center cluster.
3. Make a mark on the wire one inch from the last crimp cover added to the center cluster. Slide a crimp bead over the mark, crimp and cover it. Add a coconut, crimp and cover to complete the cluster.
4. Repeat step 3 to add the remaining cluster for that side.
5. Fold the end of the SilverSilk over about ¼ inch, dab it with Suoerglue and slide it into one of the crimp ends. Crimp the center section with your chain nose pliers.
6. Repeat steps 3 through 5 on the other side of the center cluster to complete the other side of the necklace.
