**Loam Duplex with Gold/Black Leather**

- Gold/Black Leather #3627
- Gold Plated Hook Clasp #3736
- Duplex Slider Bead – Loam #3419-8

**From your stash:**

- Jewelers Glue

**Tools:**

- Scissors or wire cutters

### Bracelet Instructions

- Cut two pieces of SilverSilk Leather Capture 10 ¾ inches long.
- Fold the two pieces of the leather in half, one piece inside the other. Slide the Duplex bead onto the folded strands and slide the bead up towards the fold, forming a loop.
- Position the loop over the hook end of the clasp and straighten the leather strands so that the leather on the outside stays on the outside. Move the slider bead towards the hook to the desired loop length.
- Holding the leather strands in position, clip the ends of the leather to even up the strands. Fill the cavity of the hook clasp half full with glue then insert the ends into the hook clasp and let the glue set according to the manufacturer's instructions.
